

E.G.G

EMPLOYMENT GUIDANCE GENERATOR

Omelette Squad

UM HACKATHON 2026

Problem: *Many individuals face challenges in making informed career decisions due to fragmented data and manual processes.*

This causes **mismatch between skills and job market**, leading to **low income / unemployment**

Why this matters:

- Career decisions directly affect income
- Not everyone has access to advisors
- Data exists, but people don't know how to use it

Poor decisions → poor economic outcomes

Source: DOSM Graduates Statistics 2020-2024, MyMahir MyCOL 2024/2025, Future Skills Framework 2025.

The Status Quo

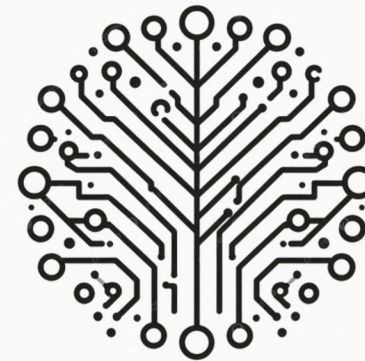

- Technological growth has transformed the landscape: 72% of roles in high-value sectors are now classed as 'Highly Skilled,' compared to just 54% two decades ago.
- This proves that the market is changing fast. If graduates don't have a Decision Intelligence System like E.G.G, they will struggle to adapt to these complex new roles.
- 32.2% of Malaysian graduates are currently in skill-related underemployment because they lack data-driven guidance to align their education with market demand.
- Traditional career advice lacks Trade-off Analysis, failing to calculate the Return on Education (ROE) or the Break-Even Point for high-cost degrees.

Solution

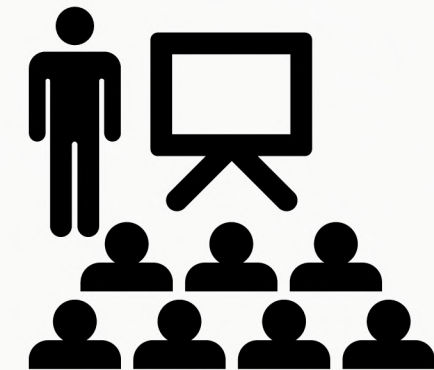

GLM-Driven Intelligence Engine

Utilizing the Z.AI GLM as the critical "brain" to perform context-aware reasoning.

Semantic Heuristic Layer.

Replacing rigid formulas with Z.AI's high-dimensional reasoning to evaluate "Decision Quality."

Scenario-Based Optimization

Personalized career strategies based on real-life constraints.

— How does EGG work?

- ① Loads knowledge base from various sources(DOSM, MYCOL etc...)
- ② Cross-reference user's experience with each row in the dataset
- ③ Z.AI ilmu-glm5.1 acts as a consultant and evaluates the user's profile
- ④ Outputs a structured JSON object with detailed recommendations for the user to act upon

**RAW ECONOMIC SPREADSHEETS + PERSONAL STORY ---> DATA BACKED
ROADMAP**

Why EGG?

- 1 Reduce wrong career decision
- 2 Increases access to opportunity
- 3 Optimizes growth path
- 4 Empowers Long-term Financial Independence

OUR AI ANALYZER BRIDGES THE GAP BETWEEN PERSONAL POTENTIAL AND MARKET DEMAND, ENABLING SMARTER CAREER DECISIONS THAT LEAD TO LONG-TERM ECONOMIC EMPOWERMENT.

UM HACKATHON 2026

— Future Improvements

Expansion of dataset

- Include datasets of all job types instead of only tech related jobs
- Integrate more governmental statistics related to graduate statistics, job market, salary etc.
- Collect user experiences

Smarter Decision Intelligence

- Add weighting system (skills vs interest vs salary importance)

Personalized AI Advisor

- Chat-style interface
- Ask follow-up questions
- Refine recommendations dynamically

THANK YOU
